VYSHNAVI KARUMURU

Bloomington, IL | +1 (305) 427-1701 | karumuruvyshnavi2000@gmail.com | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

- Experienced Full Stack Developer with a 4+ years of strong background in building web applications using **React, and JavaScript**.
- Proficient in backend development using Java, Spingboot implementing RESTful microservices for seamless data communication.
- Skilled in database management with **Oracle SQL**, **PostgreSQL**, **and MongoDB**, ensuring optimized queries, data integrity, and performance tuning for large-scale applications.
- Hands-on experience with cloud technologies, including AWS and Azure for scalable application deployment.
- Strong understanding of **DevOps** and **CI/CD pipelines**, integrating **GitHub Actions**, **Jenkins**, **Docker**, **and Kubernetes** for automated deployments and infrastructure management.

TECHNICAL SKILLS

Languages : Java, JavaScript (ES6+), TypeScript, Node.js, Python, C, C#, HTML5, CSS3, XML

Frontend & Backend: React.js, Redux, Angular, RESTful APIs, Spring Boot, Spring (Core, Data JPA, MVC)

Databases & Cloud : PostgreSQL, MongoDB, MySQL, Redis, Azure, AWS (EC2, S3, Lambda, CloudFront, Cognito, Aurora)

Deployment & Testing: Docker, GitHub, Jenkins, Kubernetes, JIRA, Postman, JUnit, Jest, Swagger, Dynatrace

WORK EXPERIENCE

Full Stack Developer | Fiona Solutions

Feb 2024 - Present

- Designed and developed a client-facing application with React.js and TypeScript, using Material-UI for enhanced UI/UX.
- Optimized enterprise-level microservices using Java, Hibernate ORM &PostgreSQL, ensuring scalability, and performance.
- Integrated **Swagger** UI for API documentation, streamlining cross-team collaboration and reducing debugging time by **50%**.
- Managed containerized application using Docker & Kubernetes on AWS ECS, reducing service initialization time by 60%.
- Built an automated notification system using AWS Aurora, enabling real-time data processing across 15+ client workflows.
- Led RESTful API development for backend services, integrating secure authentication mechanisms and optimizing API interactions for scalable and high-performance applications.
- Initiated automated CI/CD pipelines using **Jenkins**, reduced deployment time by **30%**, for efficient software deployment.
- Worked in **Agile teams**, participating in daily stand-ups, sprint planning, and retrospective meetings to ensure smooth collaboration and continuous delivery of high-quality features.

Full Stack Developer | Suvarna Technosoft

Jun 2020 - Jul 2022

- Developed and deployed **React** based enterprise applications for healthcare and pharmaceutical providers using **AWS**, improving user engagement and response times by 30%.
- Built secure **Java 2EE** applications using **Spring Boot**, with **RESTful** microservices and **Redis** caching, reducing API calls by 50% and tracked performance with **Dynatrace**.
- Led technical debt removal initiatives, refactoring legacy **Java** codebases to improve modularity and reduce bugs by 30%.
- Optimized Oracle SQL queries and indexed high-frequency database transactions, reducing query execution time by 25%.
- Conducted root cause analysis on high-severity production incidents using JIRA, implementing performance optimizations.
- Implemented process enhancement initiatives, automated deployment pipelines with **Jenkins**, by 40% faster deployment times.
- Collaborated with cross-functional team to develop new application features, while following HIPAA compliance guidelines.

EDUCATION

Florida International University

Miami, FL

Masters in Computer Science (Courses: DBMS, Introduction to Algorithms, Operating Systems, Data Mining)

Level and Nobert Technological University

(CGPA – 3.63)

Jawaharlal Nehru Technological University

Hyderabad, India

Bachelors in Information Technology (Courses: Data Structures & Algorithms, Java, Web Frameworks)

(CGPA - 3.30)

PROJECTS

Flashcards AI Application | Next.js, TypeScript, Tailwind CSS, Node.js, OpenAPI, PostgreSQL

- Developed an AI powered solution for a Quiz Application avoiding manual quiz generation, boosted 25% learning efficiency.
- Improved PostgreSQL databases with Drizzle ORM for robust backend services and optimized REST API interactions.

Grab It. a Food-ordering Application | MERN

- Built a food ordering system using MERN stack with JWT-based user authentication, shopping cart, and payment features.
- Created an admin panel for managing food, orders, and business operations using Context API, React Hooks, and Axios.

CERTIFICATIONS

- AWS Certified: Solutions Architect Associate
- Microsoft Certified: Azure Developer Associate, Azure Fundamentals, Data Fundamentals
